EXPERIENCE

Independent Developer — Full Stack Web Developer

DEC 2021 - PRESENT

CoinFolio (Project)

- CoinFolio is a full-stack cryptocurrency web application designed to help users track their favorite coins and get a 7-day snapshot of the price.
- The app was built with Next-auth, Prisma, Google provider for authentication, and Trpc as a wrapper for serverless functions.
- The UI was built with Tailwind for theming with dark and light modes.

Popcorn Tracker (Project)

- Popcorn tracker is a full-stack movie tracking application that allows users to search for movies and save them.
- The front-end was built using Typescript, React, and Material UI.
- The back-end was built using Node, Nest.js, Typescript, and Postgresql.

Freelance — Full Stack Web Developer

JAN 2022 - PRESENT

Skyline Media Marketing (Client Project)

- Digital marketing and branding company located in New York. They came to me looking for a website for their company that used the latest technology.
- I made them a website using React, Gatsby, Style-components, and Netlify CMS for git-based content management.

Artec Manufacturing — IT Support Specialist

JAN 2013 - PRESENT

- Ensure organizational operations by providing network and technical support.
- Increase operational productivity by setting up and configuring specialized machining tools for production.
- Perform backups in critical business resources.
